

Startup and Innovation Cell

An Startup and Innovation Cell aims to foster entrepreneurship and innovation by providing the necessary support to startups and early-stage businesses. Startup and Innovation Cell is a dedicated facility or program that nurtures startups, entrepreneurs, and innovators by providing essential resources, mentorship, and infrastructure. It acts as a bridge between an idea and a successful business by offering guidance, networking opportunities, and financial support. The primary goal of an incubation cell is to promote **entrepreneurship and innovation** by helping early-stage businesses overcome initial challenges. It provides structured support to startups, enabling them to develop sustainable business models and scale effectively.
